● SECTION 1

Getting Started

MyDepotMaster (MDM) is a mobile-first business management app that works on any Android phone or modern browser. It requires no installation from an app store — you can install it directly from Chrome or download the APK file.

1.1 Installation

- 1

Open in Browser
Visit mydepotmaster.github.io/MyDepotMaster/ on Chrome (Android) or any modern browser. The app loads immediately — no download needed to start using it.
- 2

Install as App (Recommended)
In Chrome on Android, tap the three-dot menu and select "Add to Home Screen" or "Install App". MDM will appear on your home screen and open fullscreen like a native app.
- 3

Download APK
Download the APK file directly from the landing page and install it on your Android device. You may need to allow installation from unknown sources in your phone settings.
- 4

Desktop / PC
Open the URL in any desktop browser. The app is fully functional on PC and laptop screens.

1.2 First-Time Setup

When you first open MDM you will see the Welcome screen. Tap **Get Started** to begin the 2-step registration wizard.

- 1

Company Details
Enter your Company Name, District, and Country. These are used as your unique app identifier and cannot be changed later without contacting support.
- 2

Create Admin Account & Set Currency
Set a username and password for the Admin account. You must also enter your Currency (e.g. ZMW, USD, K) before completing registration. Your 1-month free trial starts immediately — no credit card required.
- ✓

After signing in, go to Settings → Commodities to add your commodities (e.g. Maize, Wheat, Rice). No commodity is pre-loaded — you define all of them.
- Your Company License Key (format: MDM-XXXX-XXXX-XXXX) is generated automatically and is shown in Settings > License. Keep a note of it — you will need it to subscribe.

1.3 Signing In & Out

Every session requires a sign-in. MDM automatically logs you out after **10 minutes of inactivity** for security. You will receive a 1-minute warning before this happens.

Feature	Description
Sign In	Enter your username and password on the login screen. Tick "I agree to the Terms" then tap Sign In.
Forgot Password	Tap "Forgot Password?" on the login screen. Reset using your Recovery PIN or recovery email (if set up).
Sign Out	Tap your profile icon in the header, or the logout button in Settings.
Biometric Login	If your device supports fingerprint/face unlock and you have previously signed in, a fingerprint button appears on the login screen.
Auto Logout	MDM logs you out after 10 minutes of no activity. This protects your data if you leave your phone unattended.

1.4 User Roles

MDM supports three access levels. An Admin sets up the system and manages all data. Managers can view and record data but cannot delete or change settings. Staff have the most limited access.

Feature	Description
Admin	Full access: create/edit/delete all records, manage user accounts, configure roles & rates, access Settings, view all reports.
Manager	Can record received stock, issued stock, inventory, work logs, and payments. Cannot delete records, manage commodities/items, or access Settings.
Staff	Can view their own work logs and earnings. Cannot add, edit, or delete records. Read-only access to most data.

● SECTION 2

Dashboard

The Dashboard is the home screen after login. It gives you a real-time overview of your entire operation at a glance.

2.1 Overview Metrics

Feature	Description
Commodities Overview	All defined commodities shown with individual balance bars: total received, total issued, and stock balance for each commodity.
Commodities In/Out Today	Total units received and issued across all commodities today.
Staff Earnings	Net earnings for all staff in the selected time period (gross earnings minus deductions).
Inventory Items	Number of distinct inventory items tracked in the General Inventory.
Today's Activity	Quick count of records entered today: stock in, stock out, inventory receipts, staff logs.

2.2 Period Filter

Use the period buttons at the top to filter dashboard numbers by: **Daily**, **Weekly**, **Monthly**, **Yearly**, or **All Time**.

2.3 Alerts & Warnings

The dashboard automatically flags issues that need your attention. A red warning box appears when any of the following are detected:

- **Stock Variance** — Physical count does not match the system-calculated balance.
- **Negative Balance** — More stock issued than received for a commodity or inventory item.
- **Bag Count Mismatch** — Staff work logs show a different bag count than stock received.
- **Pending Payments** — Staff have unpaid earnings outstanding.

Resolve warnings promptly. A stock variance usually means a physical count was done but stock movements were not recorded, or vice versa.

● SECTION 3

Commodities Tab

The Commodities tab tracks bulk goods such as Maize, Wheat, Fertilizer, or any commodity you define. Each commodity has its own received, issued, stock count, and summary records. **No commodity is pre-loaded** — the Admin defines all commodities in Settings → Commodities after signing in.

3.1 Received Sub-tab

Record every delivery of stock arriving at your business:

Feature	Description
Batch Name	A name for this delivery batch (e.g. BATCH-001, FRA JUN 2026). Batches help you track individual consignments.
Date	Date the stock was received.
Qty Received	Total quantity delivered (bags, tonnes, etc.).
Good / Damaged	Breakdown of condition on arrival.
Unit Price	Purchase price per unit. Used for cost tracking and profit calculations.
Notes	Optional field for transporter name, waybill number, etc.

Records can be edited within 24 hours of entry by an Admin. After 24 hours they become permanent.

3.2 Issued Sub-tab

Record every time stock leaves your business:

Feature	Description
Batch Name	Select the batch from which stock is being issued.
Date	Date of issue.
Transporter	Name of the transporter or recipient.
Qty Issued	Number of bags/units issued from this batch.
Sale Price	Selling price per unit. Used for revenue and profit calculations.

3.3 Variance Sub-tab

Record a physical count of stock on hand. MDM compares your physical count against the system-calculated balance and highlights any variance:

- **System Available** = Total Received – Total Issued (all-time per batch)

- **Variance** = Physical Count – System Available
- **Shortage** = Variance is negative (physical count is less than system says)
- **Surplus** = Variance is positive (physical count is more than system says)

3.4 Summary Sub-tab

The Summary view shows aggregated financials for the selected commodity and period: total received, total issued, total cost, total revenue, and **gross profit**.

● SECTION 4

Inventory Tab

The General Inventory tab is for all other products your business carries: fuel, fertiliser, stationery, spare parts, or any item you define. Unlike the Commodities tab (which uses batches), inventory tracks items by name.

4.1 Recording Received Stock

Feature	Description
Item Name	Select from your defined item list or type a new name.
Date	Date stock was received.
Qty Received	Total quantity received.
Good / Damaged	Condition breakdown.
Purchase Price	Cost per unit. Remembered for future entries of the same item.
Condition	Good, Damaged (some), or All Damaged.
Notes	Optional notes.

4.2 Issuing Items

When you issue (sell or distribute) inventory items, record it in the Issued sub-tab. Enter the item name, quantity, selling price per unit, date, and any notes.

4.3 Stock Counts

Perform a physical count of any item by tapping **+ Stock Count**. MDM will calculate and display the variance between your count and the system balance.

4.4 Item Names (Admin)

Admins can pre-define the list of inventory item names in the **Item Names** sub-tab. This prevents spelling inconsistencies and speeds up data entry.

4.5 Financial Summary

The Summary sub-tab shows for each item: total received, total issued, total cost, total revenue, gross profit, and current balance. Filter by period using the Daily/Weekly/Monthly/Yearly/All buttons.

● SECTION 5

Staff Tab

The Staff tab manages your entire workforce: logging daily work, tracking earnings and deductions, recording payments, monitoring leave, and defining job roles and pay rates.

5.1 Work Logs

Log work done by each staff member each day. Tap **+ Log Work**:

Feature	Description
Staff Member	Select from your staff list.
Date	Work date.
Task	Select the task performed (defined in Roles & Rates).
Quantity	Number of bags, loads, or units completed (depending on task type).
Time In / Time Out	Optional start and end time for this work session.
Earnings	Auto-calculated from quantity × pay rate. Shown as a preview before saving.
Deduction	Optional amount to deduct (e.g. damaged bags, late arrival).
Deduction Reason	Select from predefined reasons or leave blank.

5.2 Roster

The Roster sub-tab shows a calendar-style overview of who worked on which days, making it easy to spot absences and plan staffing.

5.3 Earnings

The Earnings sub-tab shows a running total for each staff member: gross earnings, total deductions, net earnings, total paid, and balance outstanding. Rows highlighted in amber indicate unpaid balances.

5.4 Payments

Record payments made to staff by tapping **+ Pay Staff**. Select the staff member, enter the amount paid, date, and optional notes. Payment rows are highlighted in green in the logs table.

5.5 Leave Tracking

Log annual leave, sick days, and unexcused absences for each staff member. Each active staff member's leave balance is shown against their annual entitlement (default: 15 days per year, configurable in Settings).

Feature	Description
Annual Leave	Planned leave, deducted from annual entitlement.
Sick Day	Illness — tracked separately, does not affect annual balance.
Absent (Unexcused)	Absence without approval — counted as absences, not deducted from leave.

5.6 Roles & Rates (Admin)

Define job roles and their associated tasks and pay rates. Each role can have multiple tasks (e.g. a "Porter" role might have tasks: "Off-loading" and "Loading" tasks, each with a pay rate per bag, trip, hour, or day.

Pay rates are per-unit (per bag, per load, etc.). MDM calculates earnings automatically when you enter a quantity in the work log.

● SECTION 6

Books Tab

The Books tab is a built-in document creator. Use it to write notes, financial memos, custom logs, or maintain spreadsheets — all stored inside the app and synced to the cloud.

6.1 Creating a Document

- 1

Tap + New Document
Choose either Word Document (rich text) or Spreadsheet (grid).
- 2

Enter a Title
Give your document a clear name. It will be saved with that name.
- 3

Write Content
For Word docs: type and format text using bold, italic, and heading buttons. For spreadsheets: tap cells to enter values.
- 4

Save
Tap the Save button. Your document is stored inside the app and synced to cloud.

6.2 Spreadsheets

The spreadsheet editor provides a grid of rows and columns. You can add more rows and columns as needed. Navigate between cells using the keyboard or by tapping.

6.3 Downloading Files

Every document can be downloaded to your phone:

Feature	Description
Word Document	Downloads as an HTML file that opens in any browser or can be imported into Microsoft Word or Google Docs.
Spreadsheet	Downloads as a CSV file that opens in Microsoft Excel, Google Sheets, or any spreadsheet app.

Only Admins can delete documents. All users can view and edit documents they have access to.

● SECTION 7

Settings

The Settings tab is only accessible to **Admins**. It contains all configuration options for your account.

Feature	Description
Company Info	View your company name, district, country, and License Key. The License Key is your unique identifier — note it down and share it when making a payment.
User Accounts	Add, edit, or deactivate user accounts. Set usernames, passwords, and roles (Admin / Manager / Staff). Up to 3 users on the free tier.
Currency	Set the currency symbol or code used on all financial figures (e.g. ZMW, USD, KES, K, \$). Required during signup — can be changed later in Settings.
Annual Leave Entitlement	Set the number of annual leave days for all staff (default: 15 days).
Recovery PIN	Set a 4-8 digit numeric PIN used for password recovery if you forget your Admin password.
Recovery Email	Set a recovery email address as an alternative password reset method.
Cloud Sync	View last sync time and manually trigger a sync to Firebase cloud storage.
Font Size	Adjust the app text size using the slider. Also supports pinch-to-zoom on the main screen.
Data & Storage	View storage usage and export or clear your local data.
License & Subscription	View your current license status, trial days remaining, and payment instructions.
Deduction Reasons	Manage the list of selectable reasons when recording staff deductions.
Commodities	Add, rename, or remove commodity types tracked in the Commodities tab. No default commodity is provided — Admin must define all commodities here after signup.
Deduction Reasons	Manage the selectable reasons shown when recording a deduction on a staff work log.
Manage Inventory Items	Pre-define the list of item names in the General Inventory. Access via the  Manage button in the Inventory tab (Admin only).

● SECTION 8

Offline Mode & Cloud Sync

MyDepotMaster is designed to work **fully offline**. You can record stock, log work, and do everything the app offers without any internet connection. Your data is saved locally on your device.

How Sync Works

Feature	Description
Local Storage	All data is saved to your phone's storage (IndexedDB + localStorage) instantly on every entry. No internet needed.
Cloud Backup	When online, MDM syncs your data to Firebase cloud storage automatically within a few seconds of any change.
Offline Queue	If you make changes while offline, MDM queues them and uploads everything when you reconnect.
New Device	Logging in on a new phone with your existing License Key automatically restores your cloud data.
Sync Indicator	The pill in the top-right corner shows: Synced (green), Online (blue), Offline (amber), or error.

Offline Grace Period

If MDM cannot reach the cloud to check your license (e.g. no internet for several days), it will continue to work normally for up to **7 days** using your cached license. After 7 days without a successful license check, the app enters read-only mode.

Connect to the internet at least once a week to keep your license cache current and ensure all offline data is backed up to cloud.

● SECTION 9

Security Features

MDM includes several layers of security to protect your business data.

Feature	Description
Password Hashing	All passwords are hashed using a secure algorithm before storage. Plain-text passwords are never saved.
Brute-Force Protection	After 5 failed login attempts, the account is locked for 15 minutes.
Auto Logout	Automatic logout after 10 minutes of inactivity. A 1-minute warning is shown first.
Session Tokens	Each login session uses a unique token that expires on logout.
Read-Only Mode	Expired or suspended accounts enter read-only mode — data can be viewed but not changed.
Content Security Policy	The app enforces strict browser security headers to prevent cross-site attacks.
Recovery PIN	Set a Recovery PIN in Settings to allow safe admin password reset without emailing a third party.
License Integrity	License data is signed with a hash to detect tampering via browser DevTools.

Always set a Recovery PIN (Settings > Recovery PIN) immediately after first setup. Without it, a forgotten Admin password cannot be self-recovered.

● SECTION 10

Subscription & Payment

MDM offers a 1-month free trial with full access to all features. After the trial, a subscription is required to continue using the app.

Subscription Plans

Feature	Description
Free Trial	1 full month. Full access to all features. No credit card required. Starts when you register.
Monthly	K100/month. Full access to all features. Renew each month via mobile money.
Annual	K1,000/year (save K200). 12 months for the price of 10. Recommended for active businesses.

How to Pay

- 1 Find your License Key**
Go to Settings > License. Your key is in the format MDM-XXXX-XXXX-XXXX.
- 2 Send Payment**
Send the subscription amount via Airtel Money or MTN Mobile Money to the number shown in Settings > License.
- 3 WhatsApp Confirmation**
Send a WhatsApp message to the developer with your License Key and payment confirmation (screenshot or transaction ID).
- 4 Activation**
Your account will be activated manually within a few hours. The app status will update to Active automatically on next sync.

License Statuses

Feature	Description
Trial	Active free trial. Days remaining shown in the app banner.
Trial Grace (3 days)	Trial has expired but a 3-day grace period allows continued use while you arrange payment.
Active	Valid paid subscription.
Expired Grace (3 days)	Subscription ended but 3-day grace allows continued access.

Feature	Description
Read-Only	Trial or subscription fully expired. Data can be viewed but not edited or added.
Suspended	Account suspended by administrator. Contact support.
Pending Approval	New registration awaiting manual activation.

● SECTION 11

Troubleshooting

Q: I forgot my Admin password.

On the login screen, tap "Forgot Password?" and use your Recovery PIN or recovery email to reset it. If neither was set up, contact the developer via WhatsApp.

Q: The app shows "Read-Only Mode".

Your trial has expired or your subscription has lapsed. Go to Settings > License to view your status and follow the payment instructions to reactivate.

Q: My data is missing after switching phones.

Log in with the same username and password on your new phone. The app will automatically restore your data from the cloud using your License Key. Ensure you are connected to the internet on first login.

Q: The app is not syncing to the cloud.

Check your internet connection. In Settings, tap "Sync Now" to force a sync. If the issue persists, tap "Test Firebase Connection" to diagnose.

Q: Stock balance shows a negative number.

More items have been issued than received. Check for data entry errors in the Issued records and ensure all received stock has been recorded.

Q: A staff member's earnings look wrong.

Check that the pay rate in Settings > Staff Roles & Rates is correct for their role and task. Also check for any unintended deductions in the work log.

Q: I cannot delete a record.

Only Admins can delete records. Also, some records can only be deleted within 24 hours of entry. If neither applies, check your user role in Settings > User Accounts.

Q: The app is slow or not loading.

Try refreshing the page. If you installed the app (PWA/APK), clear the app cache in your phone settings and reopen. Ensure you have the latest version by visiting the app URL in Chrome.

Q: I see "Setup Incomplete" after login.

An Admin must log in and complete the Company Setup (name, district, country) before other users can use the app.

Q: I cannot find the license key.

Go to Settings (Admin only) > License & Subscription. Your key is shown at the top in MDM-XXXX-XXXX-XXXX format.

Q: The Commodities tab is empty — no data visible.

You need to add at least one commodity first. Go to Settings → Commodities (tap ■■ Manage) and add your commodity (e.g. Maize). You will also need to set your currency in Settings → Display Preferences if not done during signup.

Q: Currency shows blank or wrong on financial figures.

Go to Settings → Display Preferences → Currency and enter your currency code or symbol (e.g. ZMW, USD, K). Tap Save. All financial figures across the app will update immediately.

Q: I cannot see the Manage button in the Inventory tab.

The ■■ Manage button is only visible to Admin users. Log in as Admin to define inventory item names.
